Hamza Mehmood

Senior WordPress Developer

SCROLL DOWN
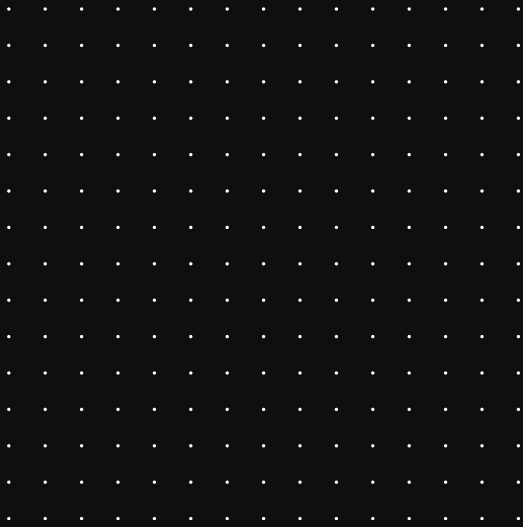

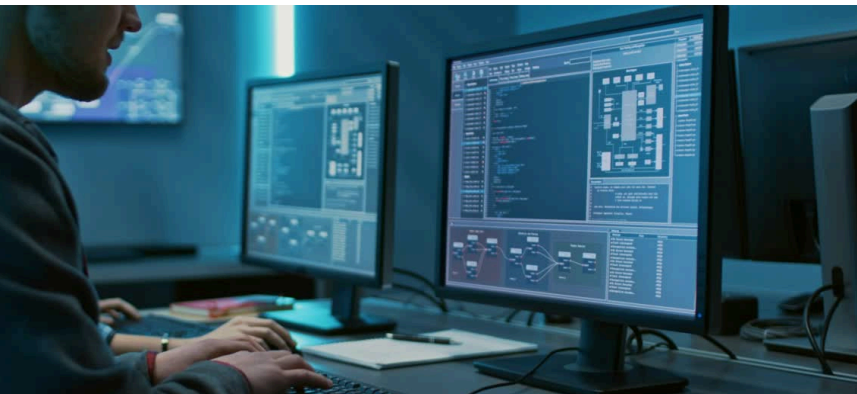

01 Overview

I'm Hamza Mehmood, a WordPress developer from Pakistan with over five years of experience in both front-end and back-end development. I specialize in creating custom themes, developing plugins, and building responsive, high-performance websites. My work spans from simple brochure sites to complex eCommerce platforms, always with a focus on delivering user-friendly and visually appealing solutions.

WORDPRESS DEVELOPMENT

Expert in WordPress: custom themes, plugins, and eCommerce solutions.

CUSTOM THEME DEVELOPMENT

Create unique, responsive themes that enhance brand identity and usability.

02 Objectives

My primary objective is to leverage my WordPress development skills to contribute effectively to your team and achieve your digital goals. I am open to full-time, part-time, or project-based roles and am eager to tackle new challenges. My goal is to deliver high-quality, impactful solutions while continuously growing and adapting to new technologies and industry best practices.

PLUGIN DEVELOPMENT

Custom plugins to enhance features and integrate seamlessly with WordPress.

Experience's

Design and Develop Complex WordPress Solutions
- Create and implement intricate WordPress solutions for both back-end and front-end development, establishing and guiding website architecture and functionality to meet client requirements.

**Create Custom Mobile-Friendly Templates and Themes**
- Design and develop bespoke mobile-friendly WordPress templates and themes that align with client branding and site design, ensuring a seamless user experience across all devices.

Develop Custom WordPress Templates and Themes
- Craft custom WordPress templates and themes tailored to client needs, focusing on mobile responsiveness and design consistency to enhance site functionality and aesthetics.

FIVERR & UPWORK

Expert WordPress Developer

Build and Maintain WordPress Websites
- Develop, customize, and maintain WordPress websites, ensuring optimal performance, security, and responsiveness for diverse client needs.

Implement Advanced Customization and Features
- Integrate advanced functionalities and custom features into WordPress sites, including custom themes, plugins, and user interfaces to enhance user experience and meet project specifications.

Collaborate on Design and Development Projects
- Work closely with design and development teams to translate client requirements into effective WordPress solutions, participating in all stages from initial concept through deployment and ongoing support.

MUSINGS

Senior WordPress Developer

Architect and Develop Advanced WordPress Solutions
- Design and build sophisticated WordPress solutions for both front-end and back-end development, establishing comprehensive website structures and functionalities to meet client objectives.

Create Custom, Responsive WordPress Themes
- Develop custom, mobile-responsive WordPress themes tailored to client specifications, ensuring seamless integration with site design and branding for an optimal user experience.

Optimize and Enhance WordPress Functionality
- Implement advanced features and optimizations for WordPress sites, including custom plugins and integrations, to improve site performance, usability, and alignment with client goals.

WEBBEXE

Team Leader & WordPress Developer

Build and Customize WordPress Websites
- Develop and customize WordPress websites from scratch, including designing themes and creating plugins that meet client specifications and enhance site functionality.

Optimize Websites for Performance and SEO
- Implement best practices for website optimization, including performance tuning and SEO enhancements, to ensure fast-loading and search engine-friendly WordPress sites.

Support and Troubleshoot WordPress Sites
- Provide ongoing support and troubleshooting for WordPress sites, resolving issues, performing updates, and ensuring the stability and security of client websites.

WEBSQUADS

Internee WordPress Developer

Courses & Education

I gained expertise in WordPress plugin development, website creation, theme customization, blogging, Elementor, user management, content creation, dashboard widgets, WordPress database management, template hierarchy, and web design.

COURSEA
WordPress Website Development

In this course, I mastered PHP for WordPress, gaining in-depth knowledge of theme and plugin development, installation, and customization. I learned to work with The Loop, implement conditionals, utilize hooks, and explore advanced features to enhance functionality and performance.

COURSEA
Custom Theme and Plugin Development

In this course, I learned front-end languages and frameworks like HTML, CSS, JavaScript, React JS, and Vue JS. I also covered back-end technologies such as PHP, Laravel, Node JS, along with database management, version control, web hosting platforms, and AngularJS.
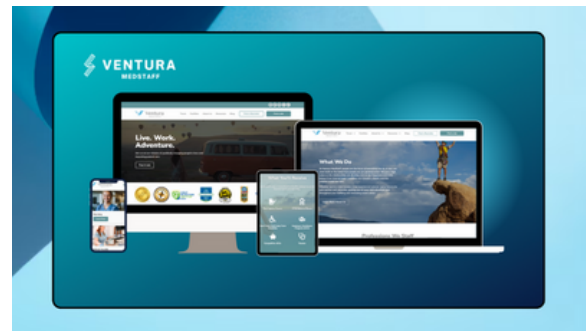

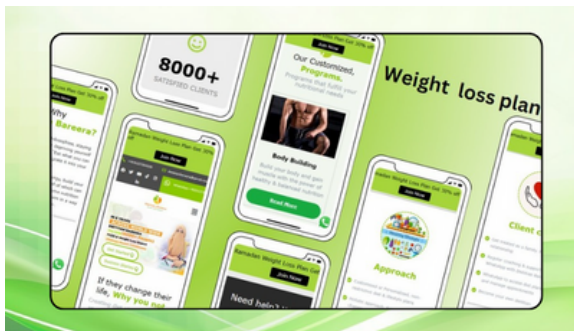

COURSEA
Full stack Development

Our Computer Science program covers programming, data structures, algorithms, and operating systems, along with advanced topics like AI, machine learning, cybersecurity, web development, and software engineering.
